ANTHONY HOLLEY

- November 5, 2015
- 300 Jay St. Brooklyn, NY • Namm 923
- Noon - 1:00pm

The Modern, Responsive Web Site

More and more use is being made of cell phones for web exploration at the expense of conventional desk and laptop PCs. The modern web has to accommodate all these many screen sizes from High definition PC screens through iPads to miniature cell phone and maybe even smaller? This presentation will give many outward examples of valid web sites and discuss internal coding techniques.

Anthony is a Lecturer at the Computer Systems Technology Department of New York City College of Technology, City University of New York. He holds a BSc from King's College London and an MBA from Regent Street Polytechnic, London, UK.

Light refreshments will be served.
