Clinician:

Lawrence E. Brecht, DDS, is Clinical Associate Professor of Prosthodontics and Occlusion at New York University College of Dentistry where he serves as the Director of Maxillofacial Prosthetics in the Advanced Education Program in Prosthodontics. He has a joint appointment at the Institute of Reconstructive Plastic Surgery of New York University School of Medicine where he is Director of the Dental Services and serves on the Institute’s Cleft Palate, Craniofacial and Ear Anomalies teams. In addition, he serves on the Executive Committee of the Institute. Dr. Brecht received his DDS from New York University and completed a residency at Boston’s Brigham & Women’s Hospital and a Fellowship at Harvard School of Dental Medicine. He then earned his Certificates in both Prosthodontics, as well as Maxillofacial Prosthetics from the New York Veterans Administration Hospital. Dr. Brecht is a member of the American College of Prosthodontists, and serves on its Board of Directors. He is the Vice-President of the American Academy of Maxillofacial Prosthetics and is a Fellow of the Academy of Prosthodontics, the current Secretary of the Greater New York Academy of Prosthodontics and a member of the American Cleft Palate/Craniofacial Association. He is also a member of the Board of Directors of Forward Face—a charitable organization that supports children with craniofacial conditions and their families. He is a frequent contributor to the cleft literature and maintains a practice limited to prosthodontics and maxillofacial prosthetics in New York City.

Dr. Lawrence E. Brecht

"Maxillofacial Prosthetics - The Interdisciplinary Approach to Excellence in Care: An Overview of the Surgical-Dental-Technical Team”

Maxillofacial Prosthetics is the only subspecialty of prosthodontics that is recognized by the American Dental Association. The provision of maxillofacial prosthetic services is truly an interdisciplinary team undertaking – where surgeons, prosthodontists and technical support specialists must rely on one another to provide the final service or prosthesis. This presentation will provide an in-depth overview of the range of services provided by the maxillofacial prosthetic team as well as the unique skills that are required from the technical members of the team.
