CUNY Service Corps Faculty-led Project Information Session

Monday, Feb. 29, 2016, 1 – 2 pm

Faculty Commons, Namm 227

**Professor Masato Nakamura
Dept. of Mechanical Engineering Technology**

Do you have a project for CUNY Service Corps students to work on? The project should help the community. If yes, please [apply](#) as a faculty-led project by March 25th! Service Corps will fund the students to help you.

Energy and Environmental Simulation Laboratory Project (EESL)

Professor Nakamura will discuss his experience as a faculty-led project and offer insights into what makes a successful application. He currently manages a team of CUNY Service Corps students to work on his Energy and Environmental Simulation Laboratory project, which focuses on solid waste management, renewable energy and the conversion of waste into energy. Students assist with environmental research including: estimating environmental impacts, sampling solid waste from neighbors, analyzing renewable energy sources and related technologies, laboratory (experimental) work, theoretical (computer simulation) work and educating local communities regarding environmental issues.

**To RSVP, please email: servicecorps@citytech.cuny.edu
Questions, please call 718-260-5846**

To become a faculty-led project, please go to: www.cuny.edu/servicecorps

Deadline: March 25, 2016
