

The Office of Sponsored Programs Presents

Scholars Exchange

A Tuesday Morning Coffee Series
Featuring 2015 PSC CUNY Research Awardees

Tuesday, April 12, 2016
8:30 - 9:30 a.m. • Faculty Commons N-227

Robin Michals, Communication Design

Pearls Under Water

China, in terms of sheer numbers of people, is arguably the country facing the greatest impact from sea level rise. The World Bank released a list in 2013 of the ten cities globally that face the highest economic losses due to sea level rise. Guangzhou was number one. All the cities built on the alluvial plain of the Pearl River Delta are threatened. *Pearls Under Water* is a series of photographs of some of these areas including the casinos of Macau, shopping centers of Shenzhen, the international architecture of Zhujiang New Town and the narrow streets of Shipai, an urban village, both in Guangzhou.

Air Quality 165, Guangzhou Opera House, designed by Zaha Hadid, Zhujiang New Town, 2016
