

*Exploring Teaching and Learning Practices to Develop
City Tech as a Living Laboratory*

CALL FOR PARTICIPANTS

Seminar Objective

The seminar is designed to make General Education more visible in our classrooms and courses. Participants will explore, implement, and assess a variety of teaching practices proven to engage students using *Intercultural Knowledge and Competence* as our main focus this year.

At City Tech we define the student learning outcome of “Intercultural Knowledge and Competence” in the following manner:

- Demonstrate expanded cultural and global awareness and sensitivity.
- Discern multiple perspectives.
- Use awareness of cultural differences to bridge cultural and linguistic barriers.
- Demonstrate proficiencies and capacities in dealing with a diverse society.
- Communicate across cultural and linguistic barriers.

A list of City Tech's General Education learning goals can be found here:

Seminar Description

We are seeking full-time and part-time faculty members to participate in City Tech's General Education Seminar in Spring 2019. As a Living Lab General Education Seminar Participant, you will become part of the growing multi-disciplinary community at City Tech that is enthusiastically thinking about and developing general education, pedagogy and student engagement in their teaching and learning practices.

Participants in the Living Lab General Education Seminar commit to exploring innovative pedagogical approaches and incorporating what they have learned into their courses. Among the questions seminar participants consider are:

- What changes can we make to the student experience that will prepare our students to succeed at City Tech, while also supporting creative, original, and critical thinking through the use of high-impact educational practices?
- How can we use City Tech's OpenLab, an open-source digital platform, to customize learning experiences for our students that will engage them in the intellectual fabric of our College and make their achievements visible to our own community and to the wider public?
- How can we use one of City Tech's greatest assets — its location within the “living laboratory” of the downtown Brooklyn waterfront — to create hands-on, place-based learning opportunities with our students?
- How do we know our students are achieving the student learning outcomes of our course?

Exploring Teaching and Learning Practices to Develop City Tech as a Living Laboratory

ELIGIBILITY

Participants in the Living Lab General Education Seminar – who may be full-time or part-time faculty members – will take part in five workshops during the Spring 2019 semester that focus on:

- General Education
- George Kuh's (AAC&U's) High-impact Educational Practices
- Open Pedagogy on City Tech's OpenLab, our open digital platform for teaching and learning
- Place-based learning
- Assessment

Participants will be inspired and supported by full-time faculty members, who are interested in sharing their own innovative teaching practices. Further details on eligibility are:

- both full-time and part-time faculty are eligible
- faculty that are available on Friday mornings in Spring 2019 semester to participate in five workshops (*dates listed are subject to change*)
 - 9:00 am- 12 noon on February 1, March 1, March 29, April 12, May 3. (participants are encouraged to attend the CUE Conference on May 10 at City Tech.) and are:
 - willing to work in a highly collaborative environment
 - willing to use the OpenLab (<http://openlab.citytech.cuny.edu>) for seminar-related activities and teaching (training and support will be provided)
 - willing to prepare a final project (an exemplary activity that incorporates open pedagogy, place-based learning, high-impact practices and assessment practices using a standard template) and share the activity on the L4: Living Lab Learning Library (<https://openlab.citytech.cuny.edu/l4/>)
 - willing to implement what you have learned in your classroom and on the OpenLab in Fall 2019

Compensation

Full-time Faculty: Active participation by full-time faculty is recognized as progressive refinement of teaching practice or service to their department;

Part-time Faculty: Active participation by part-time faculty is recognized as progressive refinement of teaching practice and is compensated at their non-teaching rate for 15 hours.

Application

Submission Deadline: 5:00 pm, Wednesday, November 7, 2018 To apply, please complete the application following or copying and pasting this link:
<https://goo.gl/forms/jBhxlFvoDY26e17g1>

Note: by applying to participate in the Living Lab General Education Seminar you agree to the terms and conditions listed above and have discussed participation with the Chairperson of your department.

Additional Information: Please contact Living Lab General Education Seminar Co-Directors, Anna Matthews, at amatthews@citytech.cuny.edu and Jason Montgomery at jmontgomery@citytech.cuny.edu or Faculty Commons Director, Julia Jordan, at jjordan@citytech.cuny.edu.
